Dear Resident,

We are pleased to announce that your water meter has recently received an upgrade. You now have the ability to monitor your own water usage!

Earlier this month, we launched a Virtual Town Hall to announce this new feature, to provide some insight on how it works, and to provide instructions on how you can sign up. We urge you to check out this presentation and tutorials on our website at <https://www.hvlcsd.org/eye-on-water-town-hall>

This new functionality is called **EyeOnWater**. You can download an app to your phone or use the internet to create and access your account. From the moment your water meter received this upgrade, **EyeOnWater** will tell you how much water you are using on a yearly, monthly, daily, or even hourly basis! We are excited to put the control in your hands so you can make informed decisions about your water use and conservation.

One great feature about EyeOnWater is the ability of the system to detect leaks. As the weather gets warmer, more outside watering might be taking place. Wouldn't it be great to see a potential leak in your irrigation system within the first 24 hours? We think this will be a great tool for keeping your monthly water costs down.

Our office is ready to answer any questions you might have on this new functionality.
